## AOEL Skin Rejuvenating Ampoule

<b>Product name</b>	AOEL Skin Rejuvenating Ampoule
<b>Specification</b>	3ml×5vials
<b>Origin of country</b>	South Korea
<b>Shelf life</b>	2 years
<b>Storage condition</b>	2°C~25°C
<b>Effects</b>	Cells regeneration, increase elasticity, Recover acne marks and blemishes, pores tightening, reduce fine wrinkles, brightening and whitening
<b>Application area</b>	Face, neck, shoulders, back of hand, chest, inner thigh, stretch marks

---

## Main ingredient

---

Ascorbyl Glucoside

---

Nicotinamide

---

Tranexamic acid

---

Ascorbic acid (vitamin C)

---

PDRN

---

Glutathione

---

Amino acid

---

Thiamine Hydrochloride

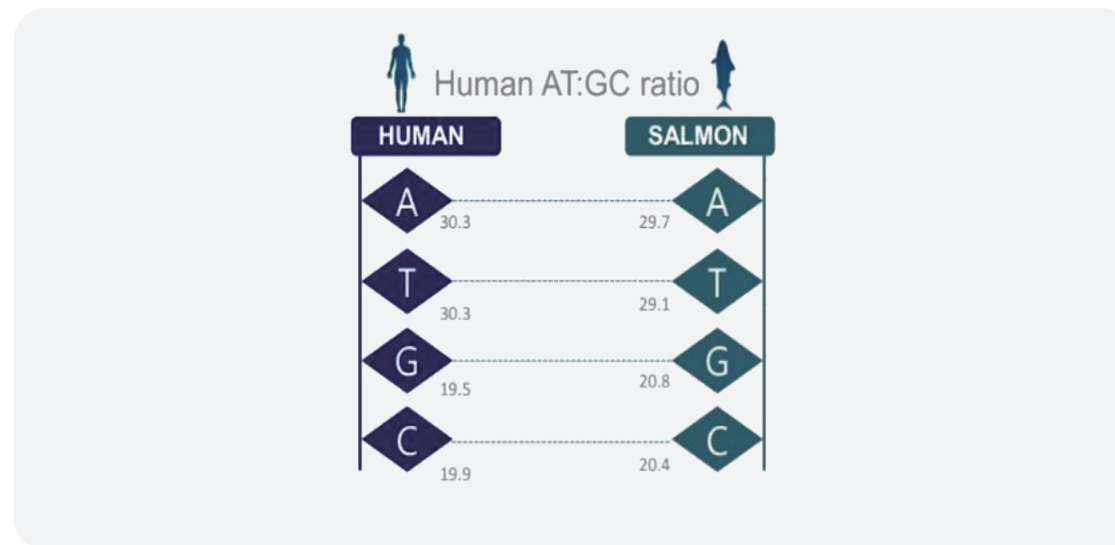

---

## PDRN(PolyDeoxyRiboNecleotide)

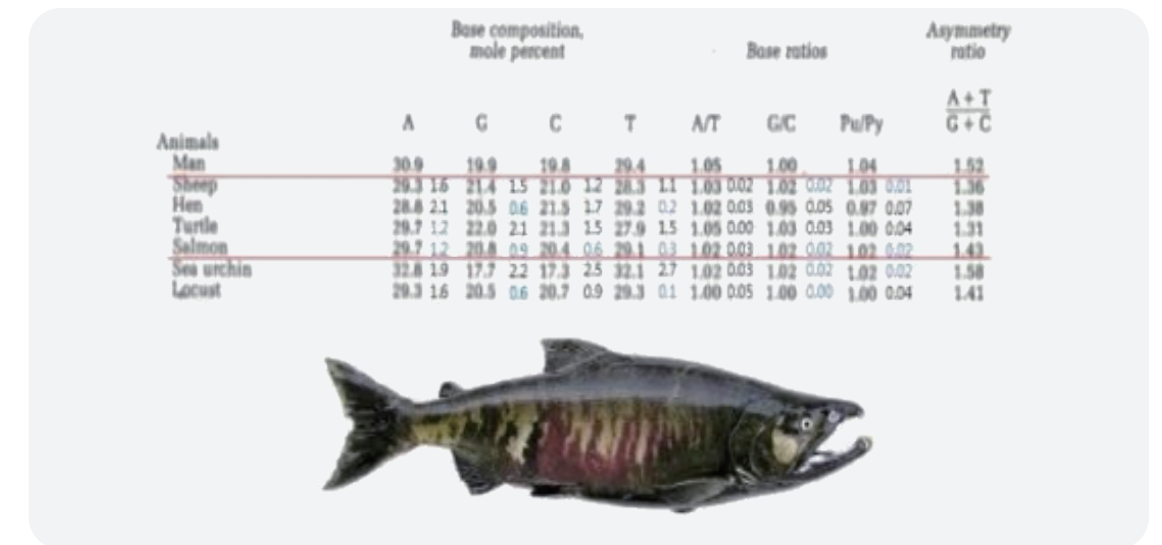

PDRN (salmon) is an active substance for tissue regeneration, which promotes the autonomous regeneration of damaged cells and tissues. PDRN is extracted from the sperm or testis cell of salmon, the low-molecular components with an average molecular weight of 350KD.

PDRN is used as medicine to treat wounds and regenerate damaged skin cells and tissues, it has the effect of anti-inflammatory.

Obtained a medicine license in Europe and referring in clinical use

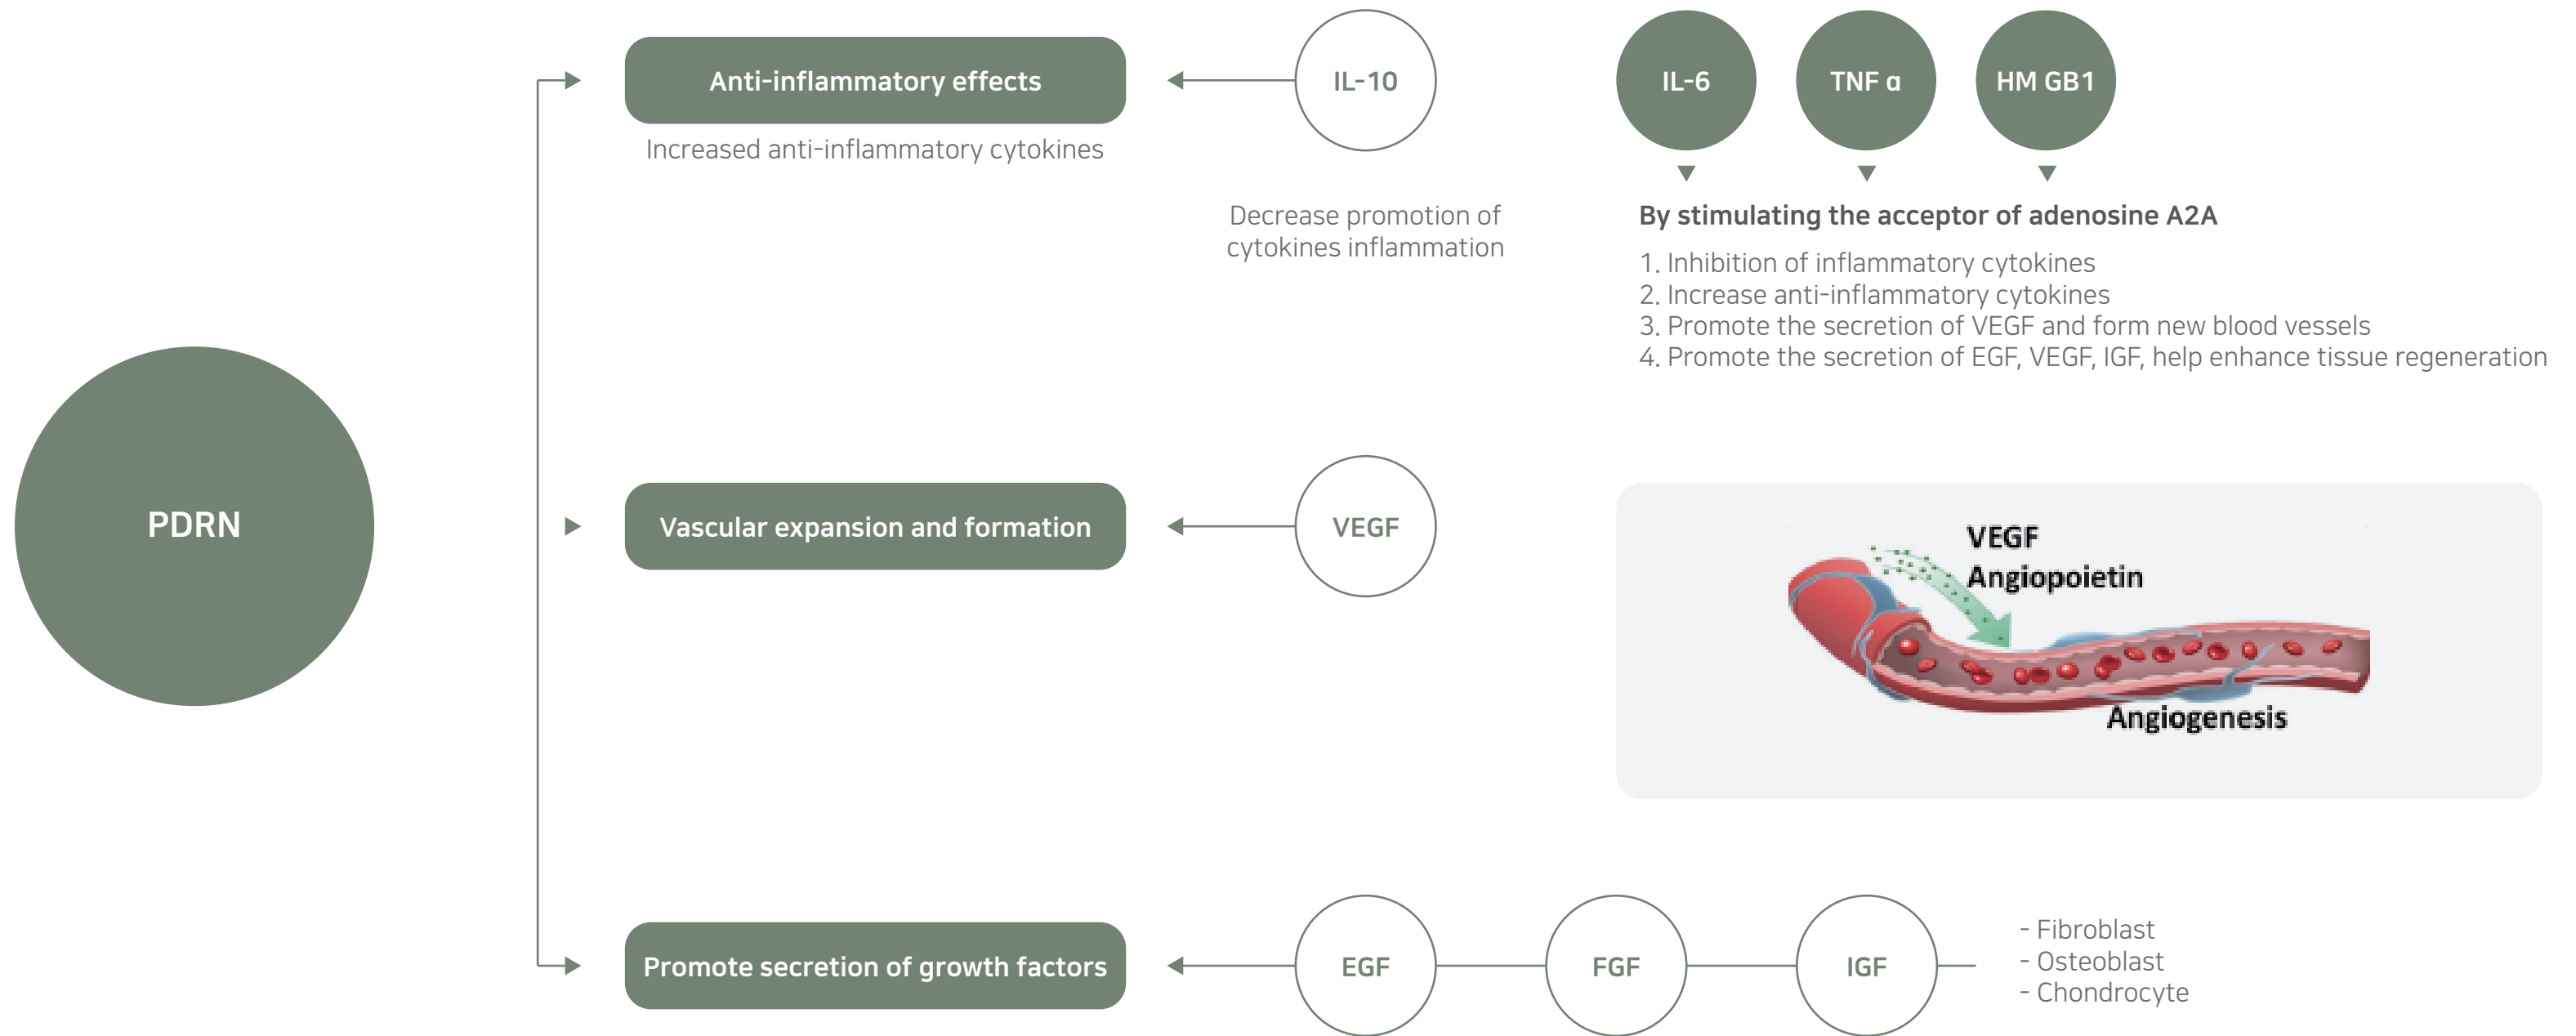

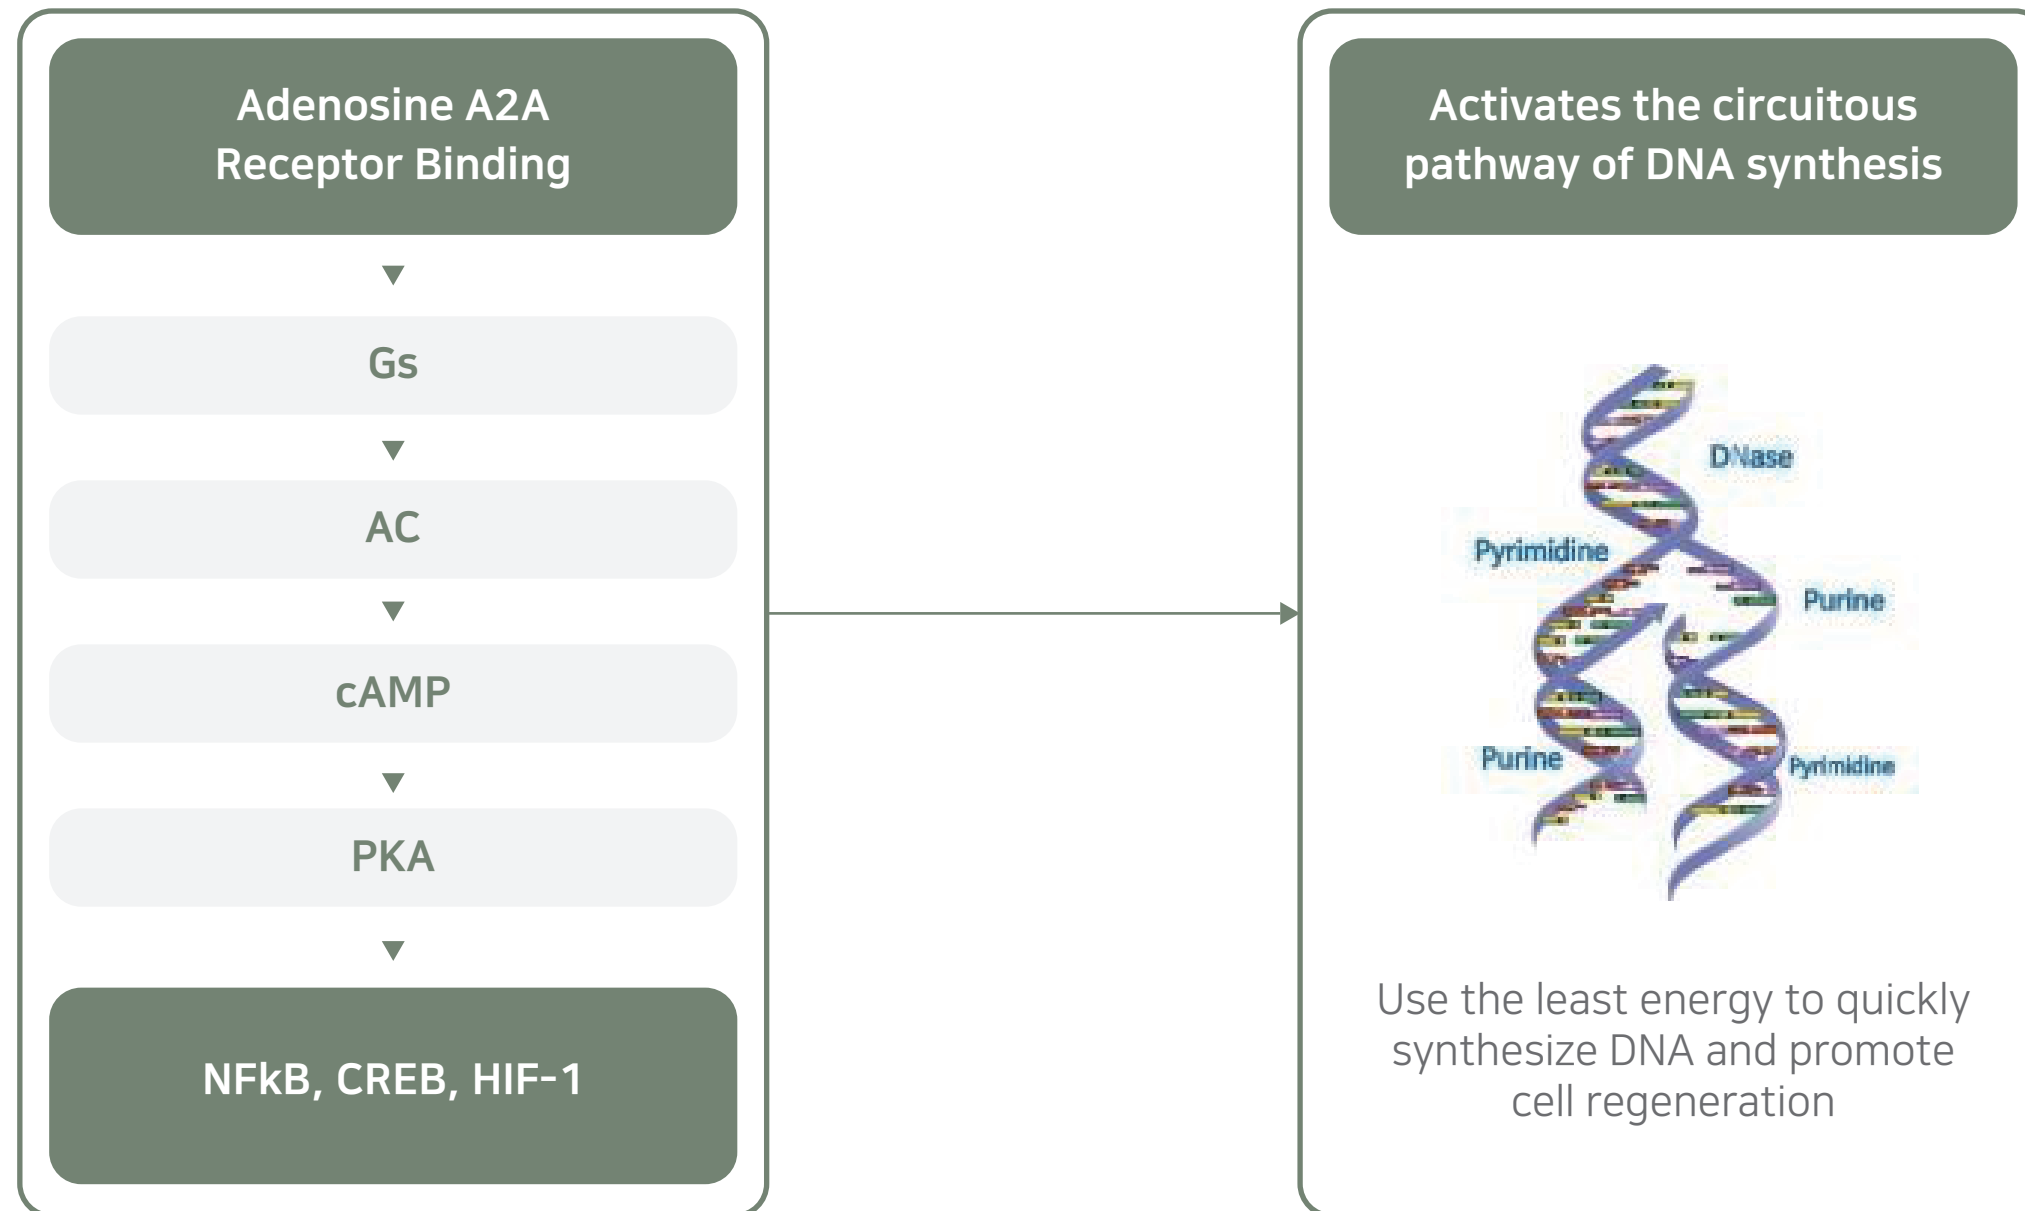

98% similarity

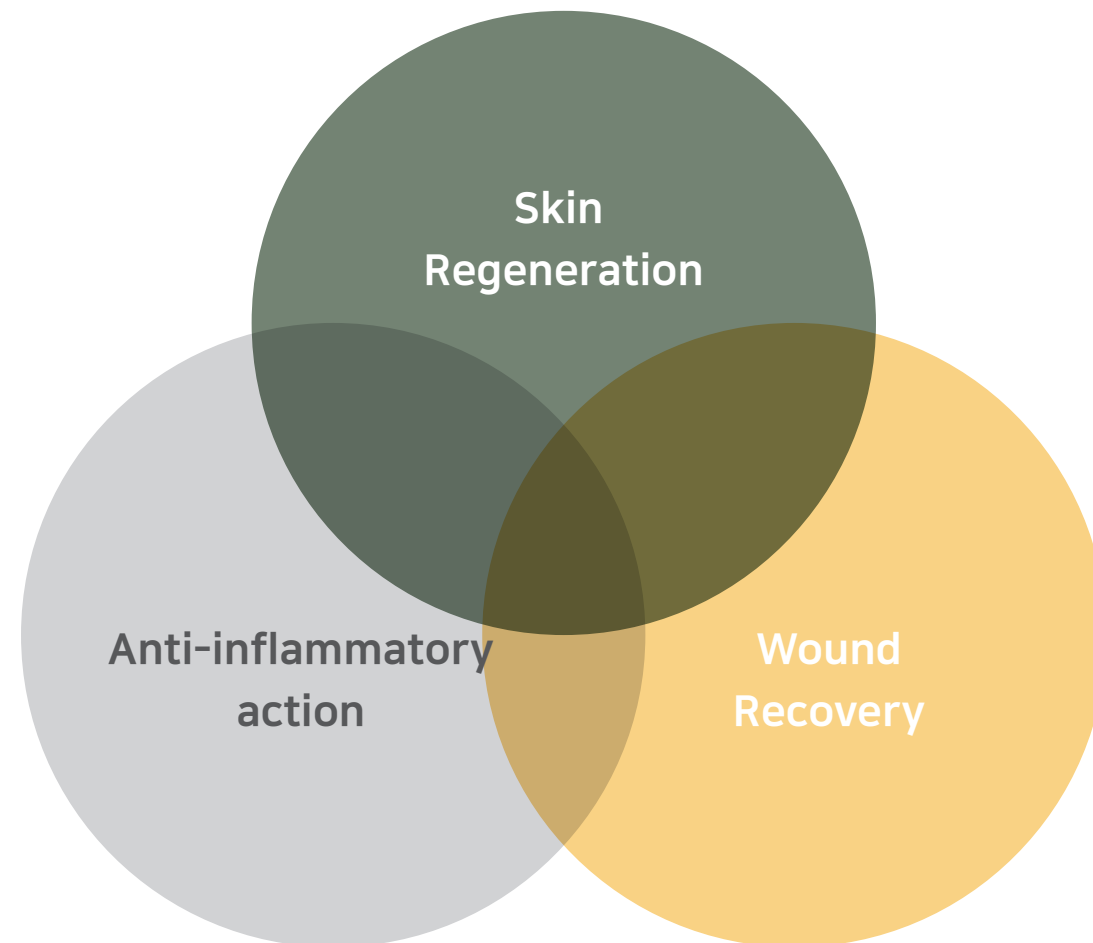

Erwin Chargaff's Data (1950-51)

- **Safety of material use**  
The DNA is intercepted and produced according to certain specifications. It's suitable and safe for the human body. It is also high temperature resistance and no impurities.
- **Improve most skin problems**  
Whitening, moisturizing, pore tightening, repairing scars, brightening skin tone, and applicable for most skin problems
- **Damaged skin repair function**  
Rapidly recover damaged skin caused by ultraviolet rays or skin irritation. At the same time, it has anti-inflammatory effect, which can effectively relieve skin swelling, heat, pain and other symptoms.
- **Continuous cells regeneration effect**  
Enhance skin elasticity of epidermis and dermis

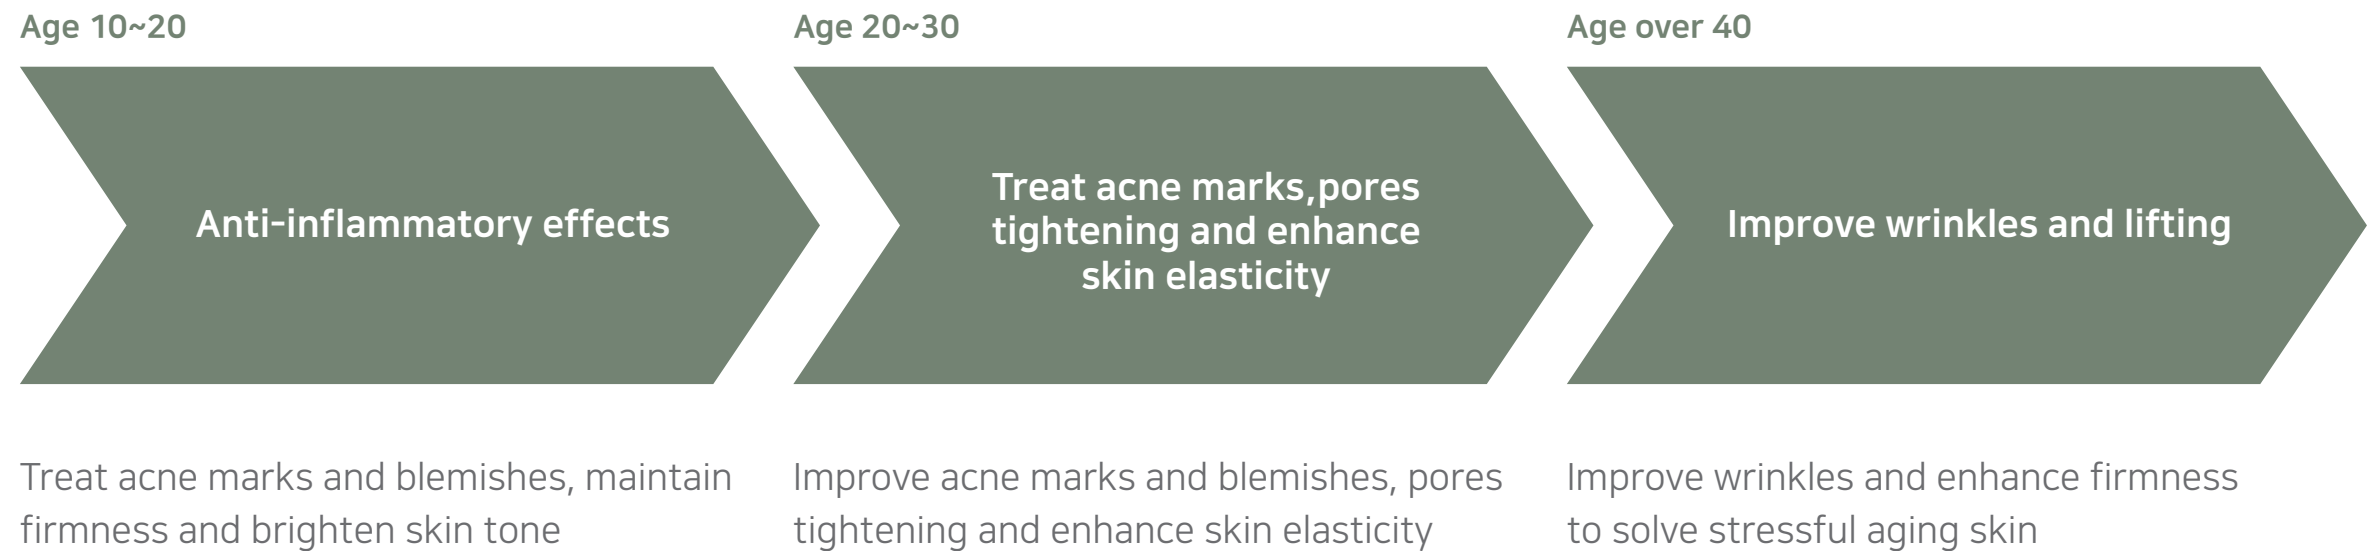

## PDRN Filler

Excellent skin cell regenerating: Activate the cell regenerative ability of the skin and enhance self-viability.

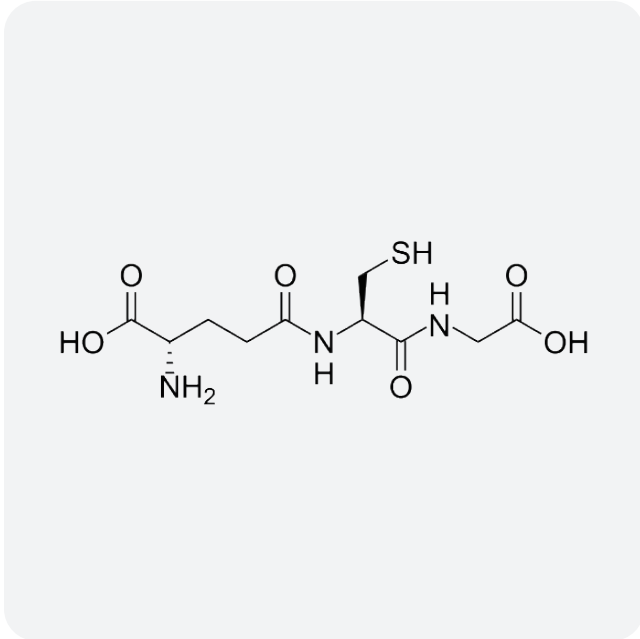

Enhance skin elasticity: supplement the aging skin that losing elastic fibers

Restore skin balancing: help skin control the balance of moisture and oil, effectively reduce sebum secretion, and improve skin texture

Smoothen skin: improve skin atrophy, wrinkle fine lines, pores tightening, brightening and whitening

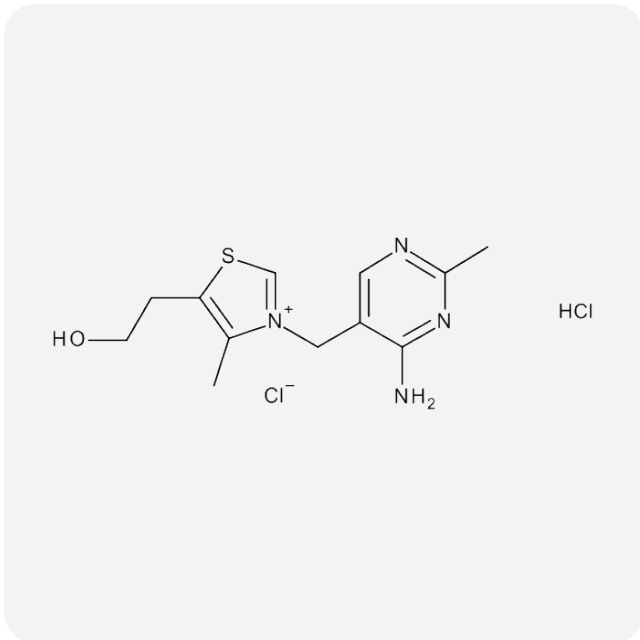

**Glutathione**

an antioxidant substance that all cells in the body can automatically produce. The antioxidant effect of glutathione surpasses 100 times that of vitamin E, which has magnificent skin cells regenerating effect. Glutathione not only has the effect of promoting the synthesis of vitamin C and E, but also plays an important role in anti-aging, anti-inflammatory, and discard active oxygen.

**Amino Acid**

Maintains the necessary ingredients for the skin and promotes the regeneration of skin tissues. Promote skin whitening and inhibit inflammation

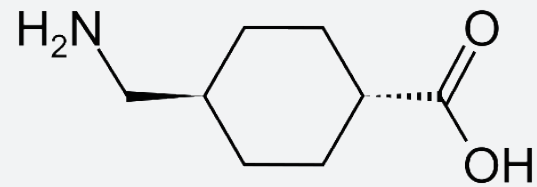

**Thiamine Hydrochloride**

Mainly acts on the regeneration of collagen that gives skin elasticity with vitamin B1.

**Ascorbyl Glucoside**

As a subordinate of vitamin C, and has the same effect of hydrolyzed vitamin C. Ascorbyl glucoside can hinder the activation of "tyrosinase" which plays an important role in melanin synthesis, reduce the intermediate substance "L-Dopaquinone" in melanin synthesis to dopamine, and prevent the production of melanin. Effectively help lighten skin pigmentation and brighten skin tone.

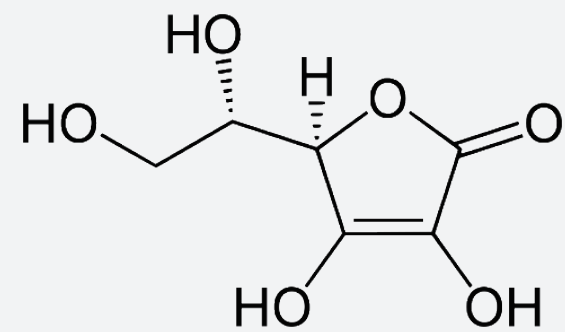

**Nicotinamide**

Equivalent to vitamin B3, that strengthens the skin barrier and has the effect of moisturizing and whitening. During the process of melanin production, it effectively inhibits the transformation of melanosomes into keratinocytes, thereby achieving a whitening effect.

**Tranexamic acid**

Fundamentally inhibit the production of melanin in the skin, increase the excretion of melanin into the body, and reduce melanin deposition. Tranexamic acid has the function of preventing the spread of melanin in a large area, and is mostly used for freckle removal.

**Ascorbic acid (vitamin C)**

Equivalent to vitamin C, and is an important ingredient to generate collagen to restore skin elasticity and prevent skin damage. It is a necessary nutrient for synthesizing nerve transmission substances, plays a role in repairing damaged skin, and can effectively remove active oxygen.
